An interesting spin off from Party Hard that turns the game on it's head by planning the parties rather than killing all the guests. The game drops you in at the deep end with only some brief explanations about to do things (Hopefully a better tutorial will exist by the time of the full release) and asks you to plan some basic parties to increase your reputation and it takes several parties before you begin to realise what works and what doesnt.

The most important factor is generate hype, the more hype you have the happier your party goers are, but you yhave to balance this with party costs, electricity use and even food and drink costs.

Overall a fun quirky tycoon game with a comedy feel to it that will keep you busy for hours of your a fan of the genre.

+ Fun pixelated graphics
+ Great comedy feel
+ Intresting twist on the Party Hard franchise

- Very steep learning curve
- Very poor tutorial. Game was designed with interesting puzzles, beautiful artwork, and an awesome soundtrack. There are some pretty cool mechanics and you really have to think outside of the box at times to complete each area.. Audience:]===

Multiplayer: No

Singleplayer: No. This game is stupid and pointless, but being pointless is the point! I honestly think I got my moneys worth if you're comparing this against 'Zombitatos the end of The Pc master race'. Great game already despite just entering early access. I can't wait to see what this one becomes.. Cute little game.♥

Easy to get achievements and doesn't take long to finish so I recommend if you just want a little pick me up!♥. More fun than you can possibly imagine.

I've been waiting for an arcade racer like this for a long time. The game is good but I can't get around the fighting mechanics , the fact that you have to toggle a button to switch sides is tedious as ♥♥♥♥ .

Pro - Soundtrack , so good !!
- Various modes to play .

Cons - Controls and fighting mechanics.

I would also recommend to pick up Blaze blue calamity trigger but it doesn't have online play .
Nevertheless , I would pass on this and buy Guilty gear X2 #Reloaded.. it freeze then stops just dont get this game. this game doesent have good controls when you play online no one there it be taking 20 mins i don't think you should get this game. I like this game because it's that tipe of game that you play aflter a CS:GO match.
It's very well made and for me,that's the game that you play when you are bored.
. Can't start the game. Need to port forward some adress... to conect to the server. That problem is so common they send you to some random guides online to download software for portforwarding and other crap.

I have played over 100+ games on my pc and laptop without the need to portforward anything.

I would sugest to the developers to not create technical barriers for your game in the first place so you dont have to ask from the user to solve them afterwards.

This is just pathetic.
