Took a few hours and that was on Welcome to our small but passionate community resource, dedicated to being the best information and news for players, modders and fans of FTL: Faster Than Light.. Entangled states lead to correlations in the results of otherwise random measurements, even when the measurements are made nearly simultaneously and at far distant points.

The current scientific consensus is that faster-than-light communication is not possible, and to date it has not been achieved in any experiment.. 02: Le portail -FR-' - Bonjour tout le monde! Aujourd'hui on se Superluminal communication is a hypothetical process in which information is sent at faster-than-light (FTL) speeds.. The impossibility of superluminal communication led Einstein, Podolsky, and Rosen to propose that quantum mechanics must be incomplete (see EPR paradox).

[3]Quantum nonlocality[edit]Quantum mechanics is non-local in the sense that distant systems can be entangled.. Superluminal communication is impossible[1] because, in a Lorentz-invariant theory, it could be used to transmit information into the past.. Proposed mechanisms[edit]Tachyons[edit]Tachyonic particles are hypothetical particles that travel faster than light..
