How to Get Started with Doitsu Shimejis are as much a part of the Japanese language as kanji. When writing Japanese, the shimeji package allows you to find the kanji that go with the characters you type. While other tools are complex and unintuitive, Doitsu is easy to use and brings a lot of benefits to your workflow. Shimeji Browser Extension for Google Chrome The Shimeji Browser Extension for Google Chrome is available on the Chrome web store. Once installed, it will appear in the Chrome extension section. The Doitsu button will be right next to the Google search button. Shimeji Browser Extension for Firefox The Doitsu Shimeji Browser Extension for Firefox is available on the Add-ons page of the Mozilla site. Once installed, it will appear in the Mozilla add-ons section. The Doitsu button will be right next to the Firefox search button. The Shimeji Browser Extension for Safari The Doitsu Shimeji Browser Extension for Safari is available on the Safari page of the Mac App Store. Once installed, it will appear in the macOS store section. The Doitsu button will be right next to the Safari search button. Shimeji in Chrome Doitsu is an add-on for Google Chrome that lets you insert shimejis into your search results without leaving your favorite search engine. It is free, so if you are not already using Google Chrome, you should take a look. Once you have installed Doitsu, it will appear in the Chrome extension section. The Doitsu button will be right next to the search button. The button looks like this: If you click the button, a window will pop up that looks like this: At the top, you can select the toolbar shimeji pack that you want to use. By default, it is the Aka-doitsu pack, but you can choose to use either the Tanaka-doitsu pack, the Oto-doitsu pack, or the Gomi-doitsu pack. Once you have selected a shimeji pack, you can add it to the pack by clicking the Add button. You can also remove shimejis from the pack by clicking the Remove button. To remove all shimeji packs, click the button and click the Remove button again. After you have added and removed shimejis, you can start typing your 82157476af
